NGUYEN CONG MINH

Full-Stack Web Developer (React / Next.js · Node.js · MySQL)

#OpenToWork · Remote Ready

Ho Chi Minh City, Vietnam (GMT+7)
Email: afk4399@gmail.com
Portfolio: minh5499999.github.io/portfolio
GitHub: github.com/minh5499999

PROFESSIONAL SUMMARY

Output-driven final-year **Software Engineering** student with hands-on internship and applied research experience architecting **3 production-ready Full-Stack web systems**. Proficient in building responsive, interactive UIs (**React 19, Next.js 16, TypeScript, Tailwind CSS**) coupled with secure, well-tested backends (**Node.js, Express.js, MySQL schemas of 19–25 normalized tables**). Highly autonomous in remote workflows using Git Flow, automated testing (**57/57 passing unit & security tests**), structured documentation, and asynchronous daily communication.

TECHNICAL SKILLS

Frontend Core:	**React.js (v19), Next.js (v16 App Router), TypeScript, JavaScript (ES6+)**, HTML5, CSS3, Tailwind CSS v4, Leaflet / React-Leaflet GIS, GSAP, Framer Motion.
Backend & APIs:	**Node.js, Express.js**, Next.js Route Handlers, Java (JSP/Servlet), Python, RESTful API Design, Auth & Security (**scrypt, bcrypt, JWT, HMAC-SHA256 RBAC, Helmet**), Google Gemini AI & ChromaDB (RAG).
Databases:	**MySQL** (`mysql2` connection pooling, relational schema design up to 25 tables, automated JSON/SQL snapshot seeding), PostgreSQL, SQL query optimization.
Tools & Remote Ops:	**Git & GitHub** (Git Flow, Conventional Commits, PR Templates), Node Test Runner (`node:test`), Docker & Docker Compose, Postman, Async Collaboration (Slack, Discord, Jira/Trello).

PRACTICAL EXPERIENCE

Full-Stack Web Developer Intern — ThiThiPet Shop (Retail POS System) 05/2026 – 08/2026 · Ho Chi Minh City
Stack: React.js, Node.js, Express.js, MySQL, bcrypt, Multer, SheetJS (xlsx), html2canvas github.com/minh5499999/thithipet-pos-fullstack

- Built and deployed an end-to-end **Retail Point-of-Sale (POS) & Inventory Management Web App** backed by a **5-table relational MySQL database** to digitize cashier billing, product catalog, and promotional voucher workflows.
- Implemented **Role-Based Access Control (Admin vs. Cashier)** with `bcrypt` password hashing and automated real-time stock deduction upon order checkout, preventing manual inventory discrepancies and overselling.
- Engineered instant digital receipt export (`html2canvas`) and multi-sheet financial/inventory Excel reporting (`xlsx`), while optimizing static UI assets by **~85%** to ensure fast cashier screen responsiveness.

FEATURED FULL-STACK ENGINEERING PROJECTS

Green City — Smart Circular Recycling & Urban Sustainability Platform Lead Full-Stack Developer · 2026
Stack: Next.js 16, React 19, TypeScript, Tailwind CSS v4, MySQL (19 Tables), Leaflet GIS, node:test github.com/minh5499999/green-city-platform

- Architected a modular **15-domain Full-Stack platform** supporting smart bin capacity tracking, 5-stage waste pickup state machines, P2P item swapping, B2B material lot reservations (48h TTL), and points-to-reward redemptions.
- Hardened backend security using **`scrypt` password hashing, `HMAC-SHA256` signed role badges, `CSPRNG` voucher generation, rate limiting, and server-side RBAC**, validated by **57/57 passing automated unit & security tests (0 failures)**.
- Integrated **Leaflet GIS** with Haversine (<100m / 24h) duplicate litter-report filtering and authored 1-command CLI database snapshot scripts (`db:setup` / `db:import`) cutting local environment setup time to **under 60 seconds**.

Bến Tre Eco-Wellness Tourism Ecosystem — 28th Euréka Research Award Project Full-Stack Developer & Researcher · 2026
Stack: Node.js, Express.js, MySQL (25 Tables), JWT, Helmet, Google Gemini AI, OpenStreetMap GIS github.com/minh5499999/bentre-eco-wellness-eureka2026

- Developed a **3-Portal Web Ecosystem (Customer, Partner, System Admin)** spanning **11 core subsystems** and **25 normalized MySQL tables** for booking green tours, community healthcare facilities, and local guides.
- Programmed an **AHP (Analytic Hierarchy Process) Multi-Criteria Eco-Score algorithm** to quantify facility sustainability and integrated **Google Gemini AI + Nominatim/Overpass GIS** for personalized itinerary planning.
- Validated production usability through field testing with **N = 65 real users** (tourists, guides, healthcare staff), achieving a weighted **System Usability Scale (SUS) score of 83.7/100 (Grade A — Sauro & Lewis benchmark)**.

EDUCATION & HONORS

Hung Vuong University of Ho Chi Minh City (DHV) — B.Sc. in Information Technology (Software Engineering, Class CT07PM) 2023 – 2027 (Expected)

- **28th Euréka Student Scientific Research Award (2026):** Competing author in Information Technology & Software Engineering (organized by HCMC Youth Union, VNU-HCM & HCMC Dept. of Science and Technology).
- **Additional R&D:** Built containerized Python RAG AI Agent with **Docker Compose, ChromaDB & Gemini API**, plus Java MVC Web applications (**JSP/Servlet**).

> **Remote Work Readiness:** Equipped with dedicated high-speed workspace (GMT+7), disciplined in **Git Flow & clean PR documentation**, proactive root-cause debugging, and concise **asynchronous daily progress reporting** (Done / Next / Blockers &
